

## **RESILIENCE CAN BE TAUGHT**

It is true! Kids are able to learn about resilience and grit just like any other skill. Surrounding your children, and yourself, with books about resilience are a very effective way to teach your children. Click the link to find different books that will support you and your family develop your growth mindset.

[Children's Books on Resilience](#)

## **Story Online**

For a reading treat, check out [Story Online](#), where celebrated actors are reading popular children's books.

## **PHONEMIC AWARENESS**

Playing rhyming games, listening to children's music, reading poetry and alphabet hunts in the home and car are great ways to learn and practice phonemic awareness skills. Click the link to get some great activities to support that summer learning.

## **Discovery Day Survey**

We have been planning some exciting Discovery Day programs for next school year. We would really appreciate your feedback on your students' interests and what would work well for your family.

Please take [this survey](#). Thanks for taking a couple of minutes to give us your input.

## **SUMMER LOGIC PUZZLES**

Emily Dyke with Math Inspirations, believes that math should be about thinking, not calculation, discovery not memorization, and self reliance not dependence. Take a look at

some of her [Logic Puzzles](#), & keep their brains engaged!

## **Family History**

You can beat the heat this Summer and spend some time as a family learning about who your ancestors are. [Family Locket](#) has just the activities to make that happen.
